Map Key

In case of inclement weather: for accurate storm tracking weather we recommend that you get updates from intellicast.com or noaa.com. We do not recommend that you watch the weather channel. Weather systems, including hurricanes are not as predictable as the weather channel may lead you to believe. We recommend that you track the systems based on the facts available on these websites. Look for the 3-4 hour updates. In the case where a Tropical system comes near the Destin area we will inform you of evacuation times and routes. Remember not to apply "Tornado mentality" to a hurricane situation. We issue Camping Credits Only in the case of actual mandatory evacuations set by the Walton County Emergency Management Council, not for rain or for false predictions.
